REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: applicant has discovered a novel and unobvious process for making blocked mercaptosilanes. The novelty lies in the use of acid acceptors which are substantially water insoluble in the free form and water soluble in the salt form. The prior art taught the use of triethylamine as an acid acceptor. However, triethylamine does not possess the claimed requirement of being substantially water insoluble in the free form and water soluble in the salt form. Using acid acceptors as instantly claimed result in a more efficient process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samuel A. Barts whose telephone number is 571-272-2870. The examiner can normally be reached on 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
